

THE ULTIMATE DESIGN BOOKLET (vol.2)

www.ferreiradesa.com

ELEVATING LUXURY

SINCE 1946

For 75 years, Ferreira de Sá has been driven to design and produce exceptional pieces for the most exclusive spaces.

Founded in Portugal in 1946 by Joaquim Ferreira de Sá, a dedicated manufactory in the north of Portugal, has maintained its roots and evolved into being the largest and one of the oldest luxury rug manufacturers in Europe. Transforming the knowledge and passion into a collection that embellishes any space, Ferreira de Sá is nowadays a luxury brand with the heritage of combining the traditional secrets with innovative crafts of adapting and producing each piece according to the unique expectations of our clients.

We design our rug collections with care and manufacture them in two different production techniques: Hand-Tufting and Flatweave. Both are operated by talented artisans who share a passion for handcrafted rugs. At Ferreira de Sá we have a solution for each and every request.

Constantly innovating, Ferreira de Sá has always improved production methods and raw materials, offering quality, flexibility, and the best solutions for its customers worldwide while working to minimize our environmental impact at every stage.

Since its establishment, Ferreira de Sá has not only grown but has continuously adapted, improved and expanded its presence worldwide. We are proud to be present in every continent with a passionate team, that supports you in every step of your rug selection. We work with the best, for the best! We are experts and craft each piece for your luxury world, whether it's an opulent house, a lavish yacht, a sumptuous hotel, a luxury retail store or other projects, all of which are carefully designed, advised and crafted by the most talented rug craftsmen.

Our newest Ferreira de Sá Hand-Tufted Collection presents a series of conspicuous rugs representing the diversity of textures, shapes, colours and materials showing our creativity and inviting you to enrich your space.

VALUABLE INFORMATION

GOOD TO KNOW

| COLOUR REFERENCE |

Despite our colour correction efforts and perfectionism when developing printed and digital formats, it's impossible to guarantee a 100% true match in colour. These formats do not replace the use of our pompoms and real samples when choosing and ordering our rugs.

| RECOMMENDED SIZES |

170x240cm, 200x30cm, 250x350cm and 300x400cm - Ø200cm, Ø250cm and Ø300cm

| PRICE BAND |

All price bands in this catalogue prevail over any previous digital or printed catalogue of Ferreira de Sá.

Details, specifications, and prices may change at any time without prior notice.

| OTHER ADVICES |

To see all the colours available of our rugs, presented on this catalogue, please consult our Warm & Fresh Pompom boxes and our Circular Collection Sample box.

MATERIALS & CERTIFICATIONS

| BOTANICAL SILK |

Providing a smooth and shiny finish for the most luxurious feel, this fiber creates a rich texture through the light reflection of the fibers. Known for its natural comfort, our Botanical Silk fiber derives from an award-winning closed loop production process, which transforms wood pulp into cellulosic fibers with high resource efficiency and low environmental impact.

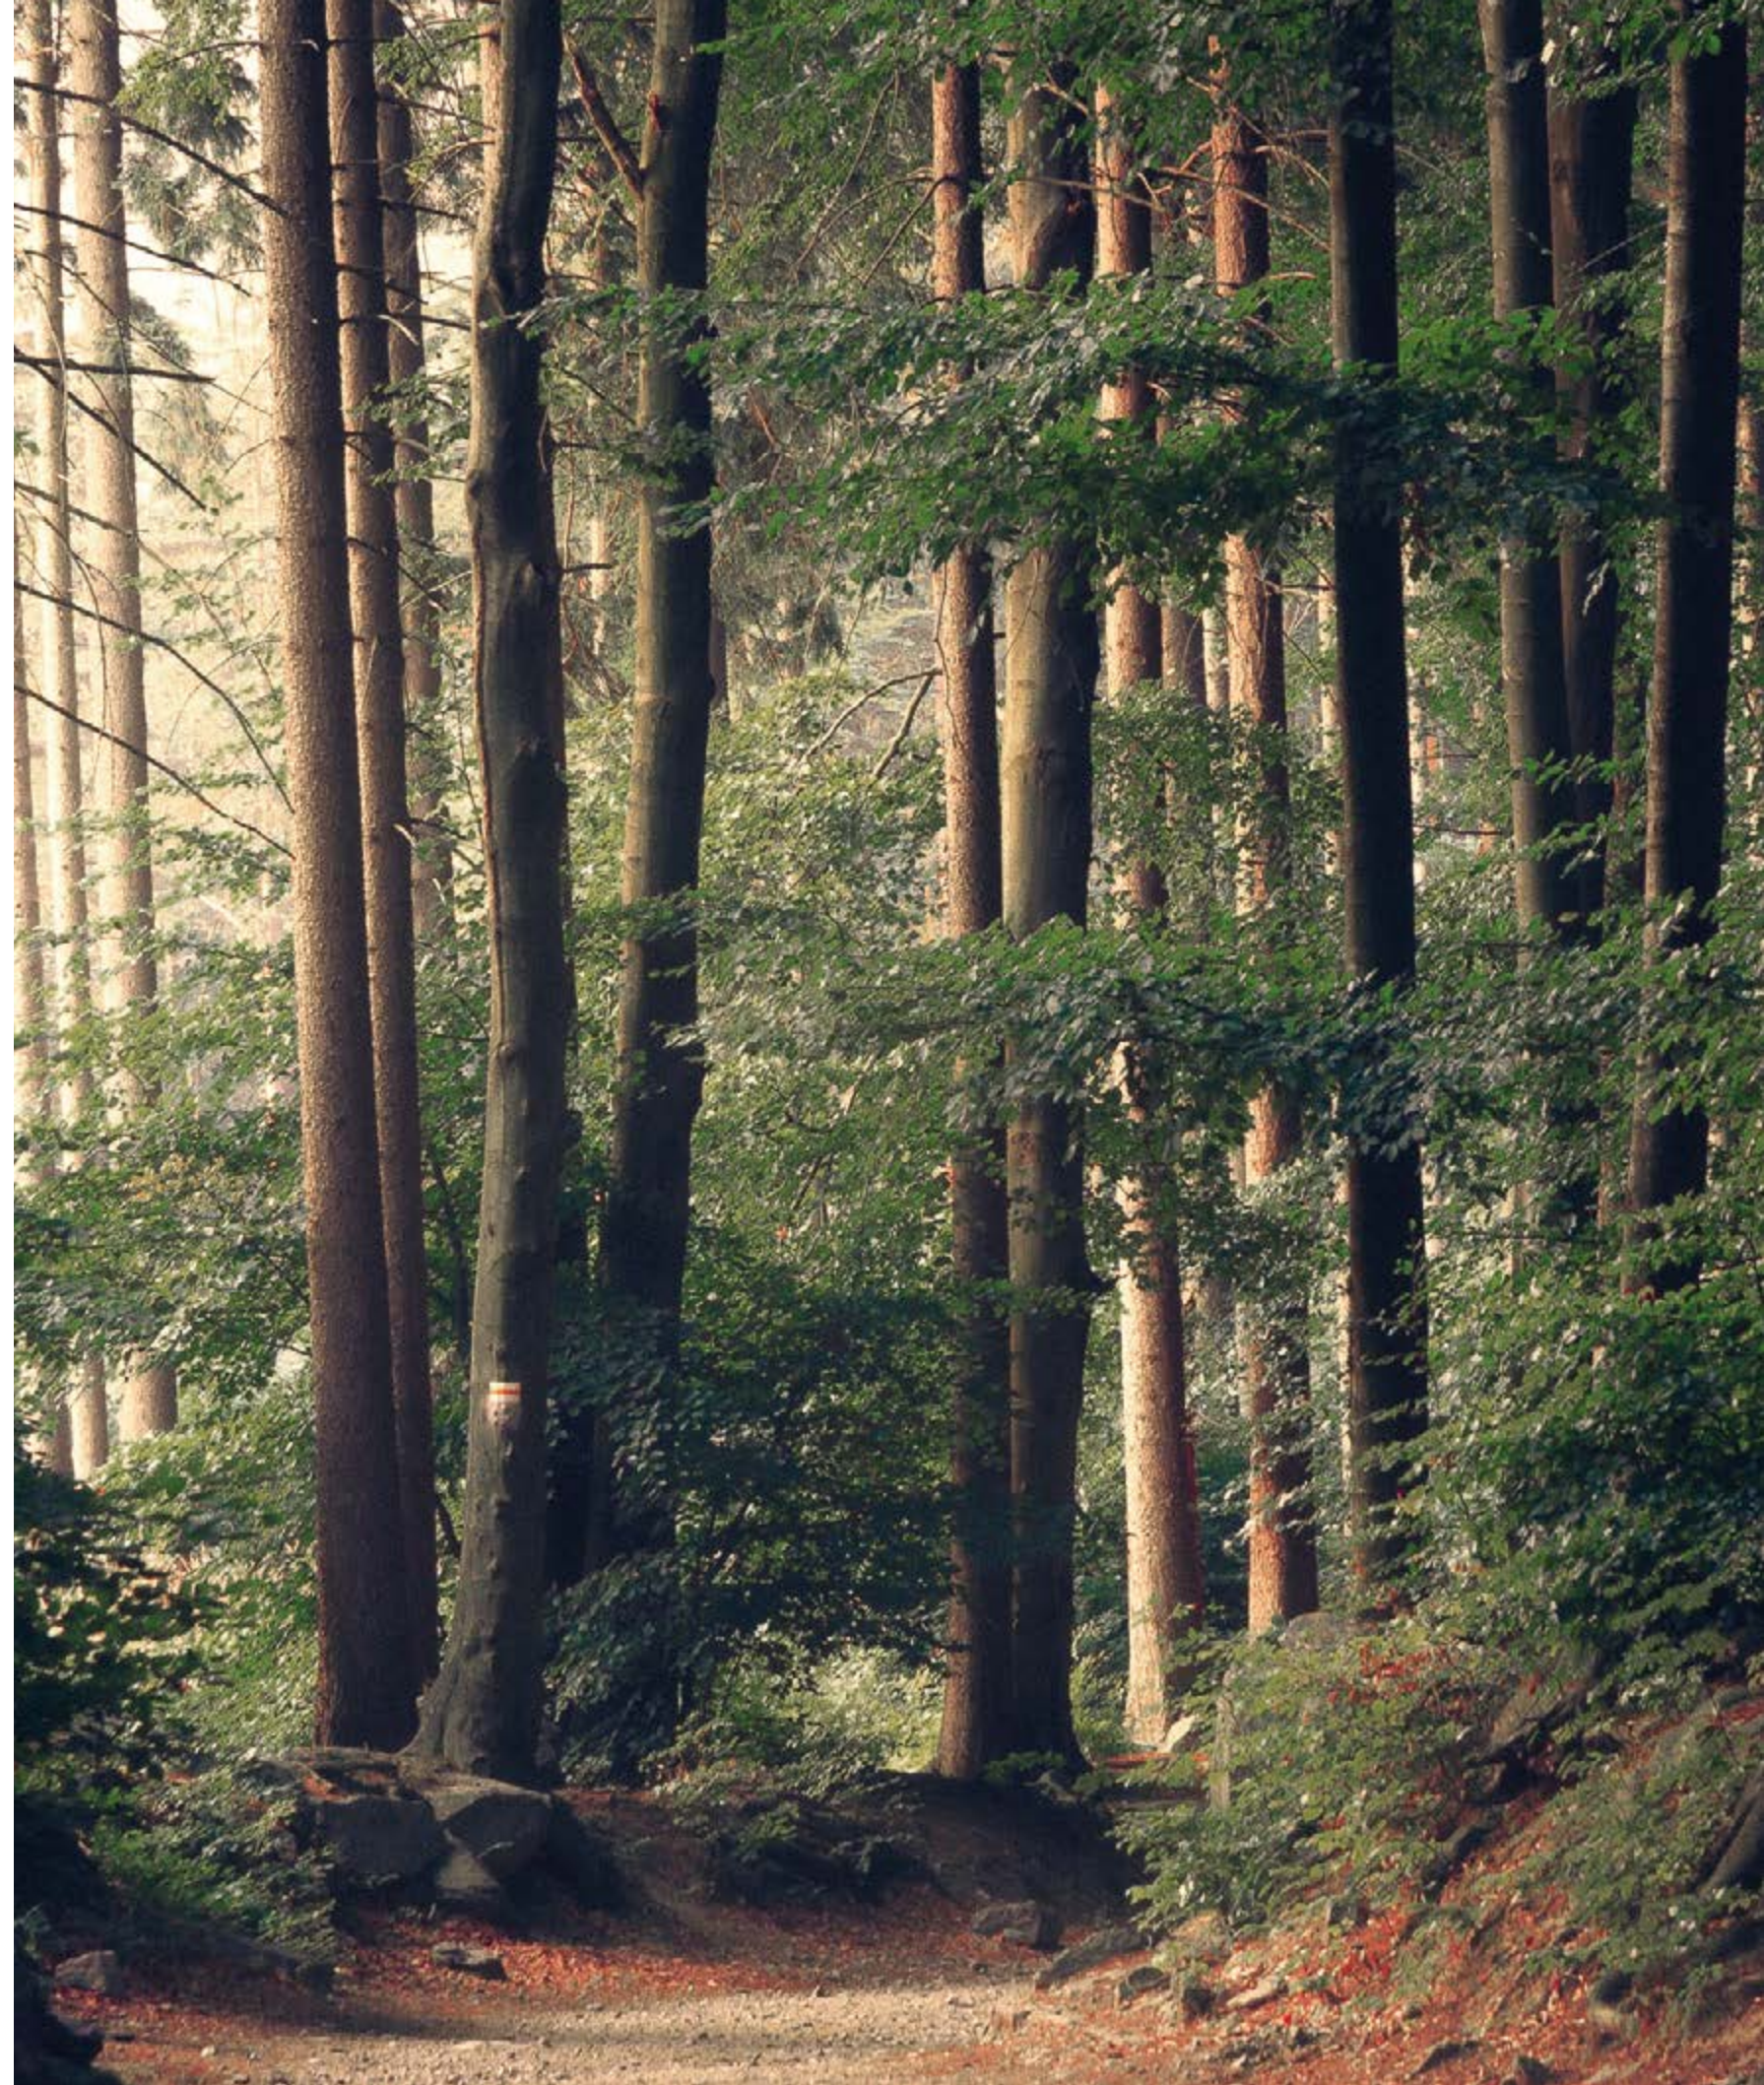

Our Botanical Silk has a eucalyptus tree origin, is biodegradable, anti-bacterial, breathable, and moist absorbing. Its sustainable production process guarantees >99% recovery of solvent, less water, chemicals, and energy use.

| CONTRACT BOTANICAL SILK |

Transforming our soft and smooth Botanical Silk into a fiber that is ready for the higher demands of the contract segment. More resistant to high-traffic and slightly less shiny than botanical silk rugs, it is made out of longer staple fibers in order to provide a similar strength to the New Zealand Wool.

| BAMBOO |

This soft and silky colour melange yarn provides a luxurious finish that exhibits interesting fluctuations in tone. Ferreira de Sá has developed an exclusive multiple cable spinning method that grants unique resistance, ideal for rugs with textured designs, providing extreme comfort. Our bamboo fibre is environmentally friendly since this is a naturally renewable resource, with rapid growth.

| MOHAIR |

Carefully chosen with a conscious principle, our Mohair wool is a natural and biodegradable material. Mohair has a beautiful lustre that adds richness and intensity to colours and feels luxurious and chic while minimizing pilling. It feels warm in winter as it has excellent insulating properties, while its moisture-wicking properties allows it to remain cool in summer. This delicate appearing, but durable thin wool, is ideal for the most demanding situations. Walking on a warm and bright rug, that presents the highest durability and provides a plush feature for high textures.

| NEW ZEALAND WOOL |

The 100% New Zealand Wool rugs are the coziest rugs in the world. This sustainable and biodegradable material is according to the Responsible Wool Standard, a voluntary standard that addresses the welfare of sheep and the land they graze on. Recognized for its durability, easy maintenance and resilience. New Zealand Wool has a natural ability to resist staining and soiling. Ideal for any residential and contract solution.

| MERINO |

Pure luxury in touch. Our extremely soft Merino wool rugs will provide the comfort feel for any low traffic residential environment. It's a certified organic fiber that stands out for its softness, comfort, antibacterial nature, thermoregulating properties.

| ECONYL® REGENERATED NYLON |

The ECONYL® Regenerated System starts with recovering waste otherwise polluting the Earth, like fishing nets, fabric scraps, carpet flooring and industrial plastic all over the world. That waste is then sorted and cleaned to recover all of the nylon possible. ECONYL® regenerated nylon is infinitely regenerated and can unleash infinite possibilities for makers, creators and consumers offering several benefits such as: high durability, no pilling and stain resistant making it the perfect rug for a floor covering project.

| FIRE REACTION |

This test grades floor coverings further and creates classifications according to the level of combustion.
SCALE FROM A TO F (A: Non-flammable and F: Highly Flammable).

| THERMAL RESISTANCE |

This test indicates whether the floor covering is suitable for use with underfloor heating. The higher the thermal resistance of a rug, the greater the heat retained between the floor and the rug itself, damaging the artificial heating.

| COLOUR FASTNESS TO LIGHT |

This test measures the colour fastness of a material following exposure to light. SCALE FROM 1 TO 8
(where 1 means a noticeable color change and 8 means no color change).

| COLOUR FASTNESS TO WATER |

This test measures the colour fastness of a material following exposure to water. SCALE FROM 1 TO 5
(where 1 means a noticeable color change and 5 means no color change).

| LUXURY USE CLASS |

It is depicted using ‘crowns’ and refers to the surface of the carpet regarding how soft and comfortable underfoot it is.
The higher the number of crowns, the more comfortable. SCALE FROM LC1 TO LC5
(where LC1 is the lowest class and the LC5 class the highest).

| USAGE CLASS |

Measurement of usage intensity capacity: Class 31 - Low Commercial Use / Class 32 - General Commercial Use

| CASTOR CHAIR SUITABILITY |

Resistance to wheelchairs (from 2.0 onwards it is considered resistant and suitable for the occasional use of castor chairs)

| USAGE CLASS |

Measurement of usage intensity capacity: Class 21 - Low Domestic Use / Class 22 - General Domestic Use

FERREIRA DE SÁ

A SUSTAINABLE COMPANY

Committed to a sustainable manufacturing process, Ferreira de Sá seeks to improve continuously its entire production chain in balance with nature. We are always looking for ways to improve: from our raw materials and manufacturing processes, we have been adopting a series of initiatives to improve all our processes. All our products are manufactured in Portugal, with sustainable and innovative materials and solutions and whenever possible, with local supply. The beauty and comfort you experience with each of our rugs comes along with a conscious choice for a brand that works based on a philosophy for a sustainable future and being able to support local artisans and our community.

CARE AND MAINTENANCE

CARE AND MAINTENANCE

GENERAL NOTES

After the rug is installed some parts may appear wrinkled. These creases will disappear after a few days, as rugs tend to flatten by itself. For day-to day maintenance of any rug, we recommend the usage of a good vacuum system regularly with an average power of 2000W. Areas with high traffic, such as corridors, stairs and entrance halls, should be vacuumed daily. All rugs should be vacuumed twice a week. The dirt deposited on the surface will be removed with vacuum cleaning, thus preventing penetration of the dirt into the pile. The level of maintenance required by a tapestry depends on the degree of exposure to dirt and existing traffic, because daily dirtiness usually comes from external factors. It is important to rotate rugs regularly so that wearing is uniform over the years. Direct and intense exposure to sunlight should be avoided whenever possible because it can affect tones negatively by turning them into another tone, which strongly impacts the tapestry's beauty, causing spots with different tone.

| REMOVE STAINS IMMEDIATELY |

Act as quick as possible if any liquid and/or solid falls on your rug, preventing it from drying and removing it immediately with a clean absorbent cloth. Remove the solids with a spoon.

REACT QUICKLY:

- Absorb liquids immediately with an absorbent cloth, such as kitchen paper, toilet paper, cotton towel, etc;
 - Remove solid substances with a spoon. Any remaining residue can be treated;
- When applying cleaning agents, follow the instructions of the package. Never apply the cleaning agents directly on the stain, apply them firstly on a clean cloth and always test it on a small hidden area;
- Always clean from the outside in from the outer edge of a stain, preventing the stain from spreading;
- Avoid rubbing the stain as it can cause the stain to spread and damage the rug. Just slightly tap the stained area;
 - After applying the cleaning treatment, dry the area as best as possible, applying pressure with paper towels or an absorbent cloth;
 - Brush carefully the pile with a brush to restore texture after the area is dry.

USAGE INSTRUCTIONS

| SHEDDING |

All cut pile rugs with natural materials will shed. This is a common characteristic and will not lead to a deterioration of your rug. Shedding is caused by fibers in the yarn that are cut short and get detached from the pile. This will subside over time, depending on traffic and wear. The duration of shedding also varies per yarn type and is influenced by the humidity of the environment (humidity should be +/- 50-60%). To minimize this natural phenomenon, it is Important to vacuum the rug regularly (1 or 2 times per week). It is not advisable to use central vacuum or low power vacuums. When placing the rug in a high traffic area the time of shedding will be reduced, as the excess fibers will come out quicker.

| WEAR |

It is highly recommended to rotate your rug 180 degrees every 3-6 months to balance appearance and to distribute wear evenly. Regular vacuuming minimizes the wear of your rug.

| ODOR |

Once newly unpacked, a rug may emit a characteristic odor, which comes from the natural composition of the latex used on the backing. All materials used on the rugs are safe and certified. This smell will disappear in a few days of good ventilation.

| COLOUR |

It Is recommended to protect your rug from direct sunlight. Do not keep the rug exposed directly to sunlight as it will lead to a strong color change.

| STORAGE |

When storing a rug, it is imperative to roll it. Never fold a rug even for short-term storage, as permanent wrinkles may form. Vacuum the rug before rolling it. Place a card tube on one end of the rug, which should have the same length. Roll the rug on the tube card as tight as possible. Tie the rug securely with adhesive tape. Store the rug in a clean and dry room. Avoid prolonged storage.

| SIZE |

Deviations up to 3% in the sizes are possible, since rugs are a textile and therefore flexible product.

CARE AND MAINTENANCE

CLEANING BY PROFESSIONALS

There are several deep cleaning techniques. Please consult a professional service to assure that each rug is properly cleaned and the method is adjusted to its fibers. Please consult your local rug and carpet cleaning professional about the injection/extraction method, which allows a deep cleaning with low temperatures and a rapid extraction of the liquid. Don't wait until the dirt becomes visible on the rug. If the rug is very dirty, the cleaning process is even harder and the lifespan of the rug is considerably reduced. We advise to contact a professional and recognized rug cleaning company.

WARNING: Products that contain excessive chlorine have the risk of bleaching/damaging your rug.

SALES TOOLS

FERREIRA DE SÁ

SALES TOOLS

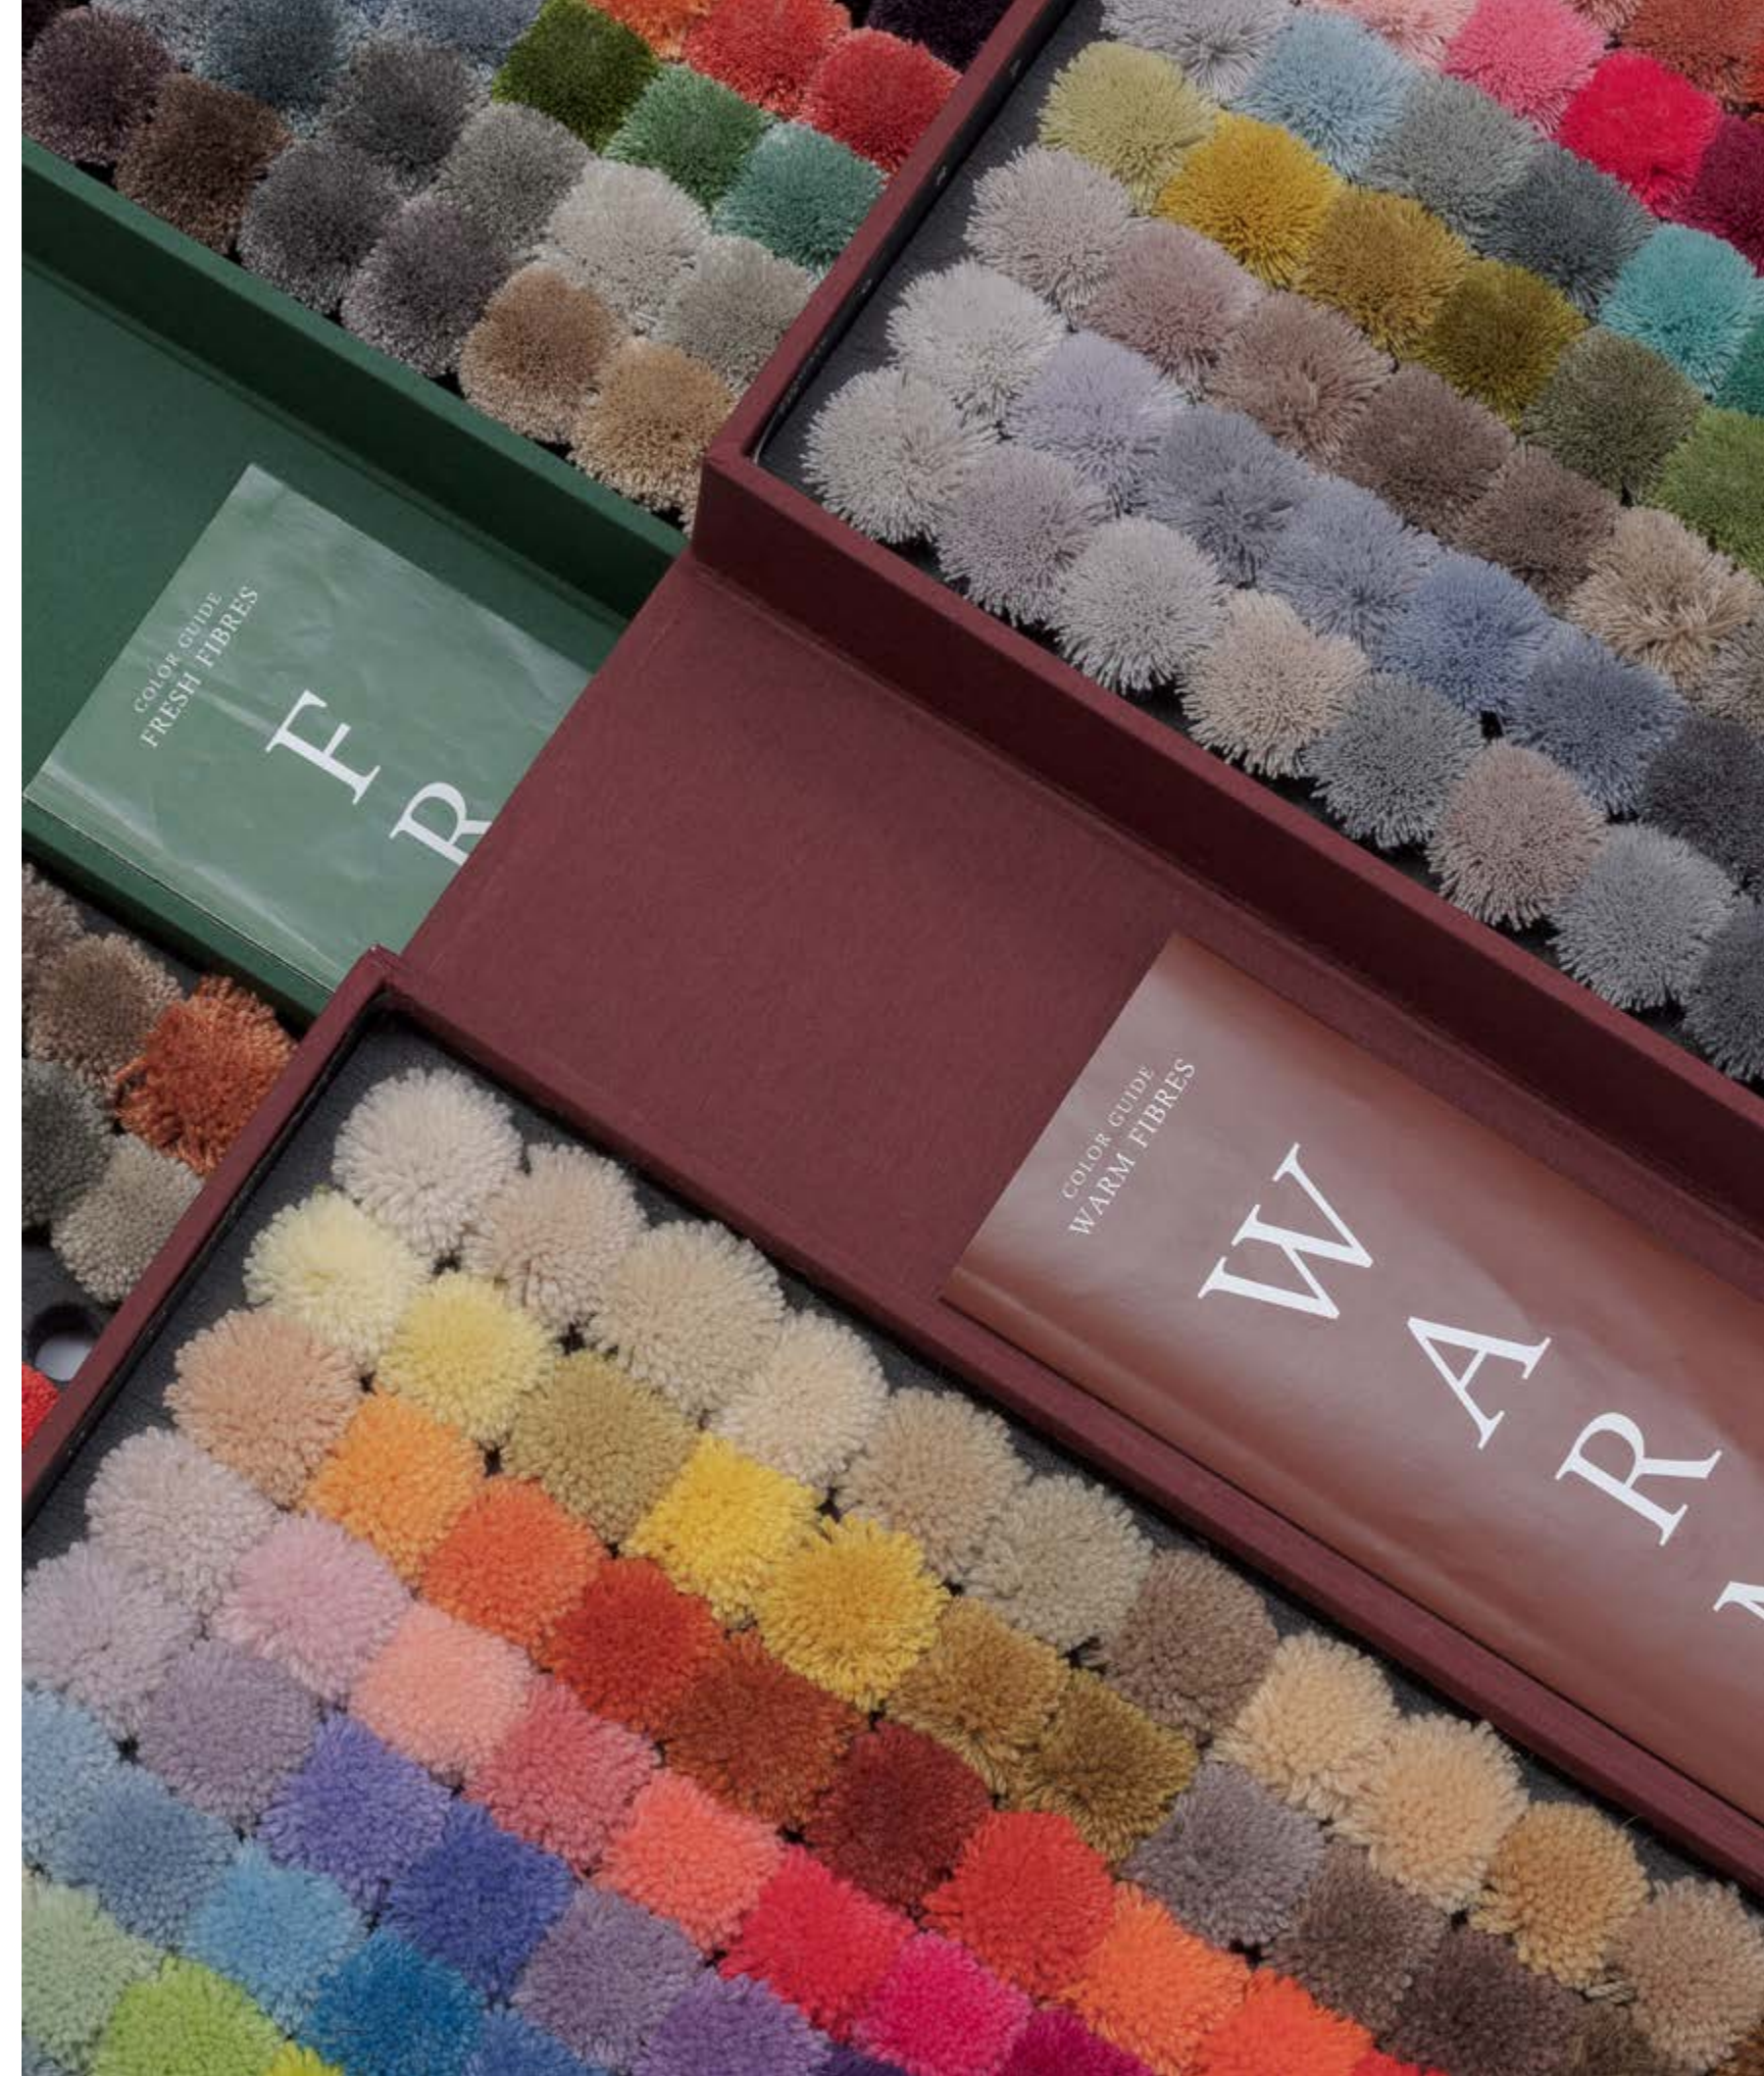

Ferreira de Sá Warm and Fresh Fibres pompom boxes are a curated selection where we privilege the trendiest colours and finest materials to create the most amazing and timeless rugs.

For warmth and coziness, choose from the Warm Box (a range of New Zealand Wool and Mohair)

For a cooler experience choose from our Fresh Box (a range of Botanical Silk, Contract Botanical Silk, Bamboo and Linen)

All these fibres were consciously chosen to give you premium sustainable solutions.
