Outdoor Rugs

Made from recycled plastic
by Studio Vondom

At Vondom, we continue to innovate and develop new techniques to come up with new and cutting-edge products. The result of these efforts is brought to life in outdoor rugs made from recycled plastic. These rugs are made for the outdoors; as they have UV treatment incorporated, they resist water and high temperatures, and they are also easy to clean and maintain. They are the perfect decorative complement; adding a warm and cosy touch to wherever you place them.

VONDOM

REVOLUTION

Our Revolution

We create outdoor atmospheres to ensure we all enjoy nature, the outdoor plants, the fresh air, and the sea. For this reason our duty is to care for and protect our environment.

We created our own Revolution. A decade ago Vondom burst into our lives launching its new avant-garde products. Hand in hand with the best designers in the world, these products were thought of to ensure a better future. We lead this revolution in the furniture industry by implementing eco-intelligence and sustainability.

Our goal is to contribute to the recovery of our Mediterranean scenery, transforming wasted and scattered plastic into long-lasting and recyclable products.

Designers

We travel the world until we find the best ambassadors of the Vondom spirit: Fabio Novembre, Stefano Giovannoni, Eugeni Quitllet, Ora-ïto, Ross Lovegrove, Karim Rashid, Javier Mariscal... Renowned designers and architects from all over, it doesn't matter where. What counts is their passion for shapes, culture and the vanguard. They transform each piece of furniture into an exclusively "Vondom" mode of expression. Nothing is random, everything happens for a reason. Just as Ramón Esteve become our artistic director for a very good reason.

Ramón Esteve

Creative Director
Luna, Posidonia, Hamptons, The Factory,
Tablet, Pixel, Gatsby, Kimono, Faz, Frame,
Quartz, Ulm, Vineyard, Vela

Ramón Esteve Cambra is Architect and Designer; arising one facet as a consequence of the other. In 1991, he founded Ramón Esteve Estudio with the premise that architecture is a global discipline. His training as an architect became a transversal vision where Architecture and Design form one single concept, almost inseparable, both generated under the same laws and the same design premises. Its aim is the development of complete environments through a mutual interaction between both disciplines, so design acts on architecture and vice versa and the importance and difficulty of both disciplines are equally acknowledged.

Marcel Wanders

Suave, Venus

Born in Boxtel, Wanders graduated cum laude from the Hogeschool voor de Kunsten Institute of the Arts Arnhem in 1988 after being expelled from the Design Academy Eindhoven. In 2000 he opened his studio in Amsterdam, gaining attention in 1996 with his Knotted Chair, which paired high tech materials with 'low tech' production methods and in 2001 Wanders co-founded the design label Moooi, of which he is co-owner and art director. Marcel Wanders' chief concern is bringing the human touch back to design, ushering in what he calls design's 'new age,' in which designer, craftsperson and user are reunited. In his process, Marcel Wanders defies design dogma, preferring instead to focus on holistic solutions rather than the technocratic. In this universe, the coldness of industrialism is replaced instead by the poetry, fantasy and romance of different ages, vividly brought to life in the contemporary moment.

Jean-Marie Massaud

Milos

Since the beginning of his career (a 1990 graduate of Paris' ENSCI-Les Ateliers, Paris Design Institute), Jean-Marie Massaud has been working on an extensive range of works, stretching from architecture to objects, from one-off project to serial ones, from macro environment down to micro contexts. Major brands such as Axor, Cassina, Christofle, Poliform, Toyota have solicited his ability to mix comfort and elegance, zeitgeist and heritage, generosity and distinction. Beyond these elegant designs, his quest for lightness – in matters of essence – synthesize three broader stakes: individual and collective fulfillment, economic and industrial efficiency, and environmental concerns. "I'm trying to find an honest, generous path with the idea that, somewhere between the hard economic data, there are users. People."

Eugeni Quitllet

Ibiza, Love, Bum-Bum, Africa, Brooklyn, Wall Street, Mari-sol, Pedrera, Bloom, Manta

The Catalan designer Eugeni Quitllet was born on 17th April 1972 in Ibiza. He graduated from 'La Llotja' art school in Barcelona. Through his creative vocabulary he exceeds simple relationships between function and style unveiling innovative objects.

Between drawing, sculpture and contemporary archaeology, Quitllet literally reveals silhouettes hidden in the material, extremely visual skeletal objects elegantly master fullness and emptiness often with a touch of humour: the Masters chair combines the 3 contours of legendary seats by Eames, Saarinen and Jacobsen, the K Ray lamp is an organic UFO, a network of veins hollowed out of the material which results in an object suspended in a frame, his signature method prevalent naturally in several of the designer's projects: the Shine vases, the Light Air lamp, the O'Clock lamp, without forgetting the O Ring watch, a hole in time in the true sense, best seller of the brand Fossil modernising watch-making codes.

Eugeni Quitllet is a design world freak capable of devouring the whole of our environment in his own way to serve it up to us transformed.

Fabio Novembre

And, F3

He was born in Lecce in 1966. He moved to Milan in 1984, where in 1992 he received a degree in architecture. In 1993 he lived in New York City where he attended a movie-direction course at the New York University. In 1994, he was commissioned to design his first project: the "Anna Molinari Blumarine" shop in London. In the same year he opened his own studio in Milan. From 2000 until 2003 he worked as Art Director at Bisazza, contributing in the international growth of the mosaic tile brand.

"plastic means "capable of being shaped" and that's exactly what is my feeling when I approach a design in plastic. There's an expressive freedom that rarely happens with other materials..."

Ora-Itô

UFO

Born in 1977, this iconoclastic artist became globally famous at the end of the 90's by hijacking in 3D the products of the most emblematic and international brands such as Vuitton, Apple, Nike, Bic... Furthermore thanks to numerous publications in the press, the fiction turned into reality. When customers tried to purchase these imaginary products, the orders flooded Ora-Itô's web site. This became the second digital work ever acquired by the National Funds of Contemporary Art (FNAC). During the years 2000, Ora-Itô dedicated himself to his own studio and the creation of real products, by developing transversal projects of nearly all the business sectors of design, architecture, communication, and so on.

His creations conceal the codes of a new luxury, timeless and universal with the same minimal working drawing: evident forms to be understood in flash, fruit of his philosophy.

Ludovica + Roberto Palomba

Bones

Ludovica+Roberto Palomba's work has always been rich of cultural references. Their projects are derived from observations of change in human behavior. Their mission is to generate products that merge function, innovation and longevity – intimate and emotional connections that last.

"We believe that good design already exist in a sort of collective unconsciousness and our task is to mold and deliver them". A truly successful piece of design must feel fresh but not unfamiliar when it is discovered.

Estudi{H}ac – JM Ferrero

Vases, Marquis

In 2003, José Manuel Ferrero founded estudi{H}ac to give life to all the ideas that appeared unceasingly in his head and in just 16 years he has turned his design workshop into a national and international reference. The passion he puts into his work is evident from the very beginning. Discreet, cultured, elegant and immensely creative, for Ferrero design is a way of life that keeps the mind fully active in terms of creativity.

We could say that the British term "bespoke" is the dogma that governs each of the Valencian businessman's designs, as he creates pieces and elements tailored to each project.

Agatha Ruiz de la Prada

Agatha

Agatha Ruiz de la Prada first stepped into the fashion world in 1981. The collection proved to be such a success that she soon opened her first studio-shop in the Spanish capital and started to participate in fashion shows in Madrid and Barcelona. Although Agatha gained a certain level of recognition early on in her career, her true fashion breakthrough came when she allied forces with one of Spain's most important department stores, El Corte Inglés. Thanks to this partnership, the designer's collections were soon distributed throughout the entire national territory. Having conquered Spain, Agatha little by little started to cross borders and gain international recognition by means of her fashion shows and exhibitions and then expanded the family of products: clothes, furniture, perfumes...

Eero Aarnio

Peacock, Roulette, Rosinante

Aarnio studied at the Institute of Industrial Arts in Helsinki, and started his own office in 1962. The following year, he introduced his Ball Chair, a hollow sphere on a stand, open on one side to allow a person to sit within. The similar Bubble Chair was clear and suspended from above. Other innovative designs included his floating Pastil Chair (similar to a solid inner tube),[2] and Tomato Chair (more stable with a seat between three spheres). His Screw Table, as the name suggests, had the appearance of a flat head screw driven into the ground. He was awarded the American Industrial Design award in 1968.

Aarnio's designs were an important aspect of 1960s popular culture, and could often be seen as part of sets in period science-fiction films.[3] Because his designs used very simple geometric forms, they were ideal for such productions. Eero Aarnio continues to create new designs, including toys and furniture for children. Eero Aarnio opened his official webshop and first Design Eero Aarnio Showroom, in Helsinki. There you can find Aarnio's latest design, prototypes and latest news.

Teresa Sapey

Adan, Chrismy, Chemistubes

Studio Teresa Sapey is an architecture and design studio based in Madrid since it was founded in 1990. The team's guiding force streams from curiosity and energy. In fact, the range of fields approached by this practice is extremely broad: It varies from spaces to displays via furniture, graphics and editorial works. Projects not only stem from feelings, but they are also capable of transmitting these same emotions to their clients and customers. "By working with spaces my aim is to be touching and therefore render emotions palpable: Three-dimensional, even four-dimensional. No matter the feelings is, as far as it is a feeling, I would go for it! I believe that architecture should interpret, build and transmit these inspiringly and usefully."
